

Business failure causes thousands to give up

Saafenet will help you straighten it out

Information implying business failure occurs 90% of the time discourages many people from trying to start their own businesses. Statistics show the truth isn't that grim for new businesses, but it's not much better. After trying several pyramid schemes many people close their ears and minds to anything related to going into business; those people avoid anyone discussing an opportunity for fear that person is trying to get them involved in another pyramid scheme. Continued failure at earning money with pyramid schemes eliminates a segment of the population from trying to go into business.

Feeding on the misfortune of those people bred a new type of shyster. This new breed swore they could get you into business for under \$100. Accomplishing that scheme would be quite a stunt since the cost of state registration and licensing usually exceeds \$100. This reinforced the beliefs of people already burned. That eliminated another segment of the population from thinking about their own businesses. These and many other get rich schemes made a lot of people rich, except the people looking to make money with them, listening to sometimes ridiculous advice, wasted their time. Many never realized those business and books made a profit on unsuspecting victims. High turnover was expected but didn't matter because there was always someone else looking to get rich quick.

Try the Saafenet plan before you give up, it won't cost you a dime to find out how we can help you.

There has only ever been one way to get a business started. And that was to choose the right business and the right nich, to begin with. That doesn't mean finding a business your friends or family like. It doesn't mean going into a business because it's cheap to get into. It means finding a business that is right for you, that is projected to be profitable well into the future. There would be no point in preparing a plan or obtaining money to get started if you chose the wrong business. Choosing the right business puts you ahead of most people who failed to do the research. The Saafenet training manual describes how to select the right business for you and to project its profitability.

Having a business plan would give you a four to five times greater chance of succeeding than a person without one. But the business plan would only be effective for the right business. It typically won't work if you chose a bad business to start with. Assuming you selected the right business, the Saafenet training manual shows you how to plan it properly. Further increasing your chances of success. A major deterrent to business success is a lack of enough money to get started. But getting money the wrong way creates another set of problems. Borrowing, mortgaging your home, using credit cards and other mistakes leave you in debt. Going into business in debt is a certain recipe for disaster.

Becoming a Saafenet Business Colleague and obtaining the Saafenet training manual shows you how to find the right business. plan it and how to raise \$20,000 to \$50,000 you don't repay. All of which help you to flourish in business over the long run. Do the math, this puts you ahead of anyone trying to start a business with less.

We show to how to start real businesses. There's no recruiting because there is no pyramid.

We don't ask you to buy a sales kit to build an organization to make money. Or tell you to buy real estate to flip, implying someone will buy houses and split the profits with you fairly. We don't tell you to become involved in affiliate marketing because it takes a lot of research. There's a bunch of junk available for anyone thinking they can make money without the right business, a plan and money. Most of it isn't worth the time it takes to read.

We show you how to make millions of dollars on traditional businesses proven to make money. Our CPA Customer Satisfaction Engineers have spent years in research to be certain you do. We don't show you how to sell dreams, we show you how to build real businesses Where you can sell the products and/or services you select. We don't show you how to make us rich, we show you how to get rich. We show you how your business must operate and how to get the money to make it happen. Look at how our system works and consider if anyone else offers you as much, without having spent a dollar of your own money:
